26. CG
27. CFL
28. BCEGJ
29. Time of year and water temperature affect the habitat.
Habitat needs depend on feeding habits of the species.
Knowing how fish feed will help to determine where to fish.
30. A throwline will have five hooks or less. One end must be attached to a permanent but no structure. A throwline may only be used in freshwater. A trot line should have more than 5 but no more than 50 hooks and be no more than 600 feet in length. Each end must be fixed to a permanent structure.
